***Reasons for Allowance***

1. Claims 1-69 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The cited prior art taken alone or in combination fails to teach the claims invention of determining belief probabilities, based on user feedback, for ontological concepts within a preference model representing a belief of user preferences and the estimating of ontology co-occurrence probabilities such that a convolution of the belief probabilities and the ontology co-occurrence probabilities is performed to generated a prioritized list from a plurality of documents to filter data for output to the user.

The closest prior art (USPN 5,704,017, Heckerman et al.) teaches a data processing system represented by a collaborative filtering system that utilizes a belief network. The collaborative filtering facilitates predicting the preferences of a user based on known attributes of the user as well as known attributes of other users. Heckerman does not teach ontological concepts within a preference model representing a belief of user preferences and the estimating of ontology co-occurrence probabilities such that a convolution of the belief probabilities and the ontology co-occurrence probabilities is performed to generated a prioritized list from a plurality of documents to filter data for output to the user.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
